Timely Information for Patients & Colleagues

LINDA L. ZEINEH, M.D., F.A.C.S.

Certified American Board of Plastic Surgery

It's rejuvenation time!

Get ready for gatherings and the holidays!

Now that masks are coming off, and family and other social functions are beginning to return, many patients are realizing it is time to freshen their appearance.

We invite you to schedule a consultation to discuss the best options for your personal goals. Dr. Zeineh seeks to provide advanced cosmetic and reconstructive techniques combined with compassionate, personalized care for each patient.

Dr. Zeineh personally performs these procedures on her patients to achieve and maintain a youthful, refreshed, and natural appearance. Some popular options that patients are considering:

Facial rejuvenation

- *Customized detailed analysis of facial aging and anatomy*
- *Upper and lower eyelid surgery*
- *Browlift (endoscopic, open)*
- *Temporal lift*
- *Facelift*
- *Neck lift and neck contouring*
- *Fat grafting*
- *Earlobe repair/otoplasty*

Non-surgical and minimally invasive rejuvenation

- *Facial injections (Botox® , and dermal fillers including the exclusive designer filler RHA Collection®)*
- *Contouring under the chin and neck region*
- *Threadlifts to reposition brows, face, and neck and to create collagen stimulation*
- *Hand rejuvenation*

Below is additional information on two procedures that have been very popular with patients -- **threadlifts** and **designer fillers**:

[Thread Lifts for Facial Rejuvenation -- Advancements & Recent Product Launch](#)

Thread lifts offer a non-surgical option for facial rejuvenation.

The recent launch of **Infinity Plus molded threads**, made by NovaThreads®, offers increased precision and accuracy for facial aesthetics.

- **How do they work?** The threads are made of absorbable material. They are placed underneath the skin to reposition overlying tissue to a more favorable location, while maintaining a natural appearance. As the threads absorb over time, new collagen is formed which will tighten your skin.
- **Where can they be used?** The threads can be placed for lifting the brows, cheek, jowl line, and neck. Also, they can be used to soften fine lines, stimulate collagen, and tighten skin on forehead, around the eyes, lips, jowls, and neck.
- **More info:** Results last approximately 8-12 months. No incisions are required. The procedure is performed in our office. No anesthesia is required.

[The Designer Filler -- Now Available](#)

We're excited to be among the first practices in the U.S. to offer the RHA® Collection, the latest innovation in hyaluronic acid fillers.

The RHA® Collection is intentionally designed for facial dynamics. It's made to mimic the natural hyaluronic acid that's found in your skin and adapt to the dynamic demands of your face. Finally, the excellence of Swiss science is now available at our select practice.

Ready to proceed?

I am safely seeing patients in our office, following CDC guidelines. I am also available for telehealth phone consultations ([657-722-1400](tel:657-722-1400)) and photos and communication via email at DrZ@DrZeinehPlasticSurgery.com.

Please let me know of any questions or concerns that you may have.

Thank you so much.

Sincerely,

Linda L. Zeineh, M.D., FACS

About Linda L. Zeineh, M.D., FACS

Dr. Zeineh is an active member of the American Society of Plastic Surgeons and the American Society for Aesthetic Plastic Surgery. She combines over 15 years of experience with cosmetic and reconstructive surgery in private practice with new technology and techniques in the care of her patients. Her first priority is the satisfaction and well-being of her patients, providing compassionate and personalized care.

A complete range of non-surgical and minimally invasive rejuvenation procedures are personally performed by Dr. Zeineh on her patients to achieve and maintain a youthful, refreshed, and natural appearance, including facial injections, skin tightening and facial/body contouring. Surgical procedures that Dr. Zeineh performs include: facial rejuvenation, body contouring, reconstructive and cosmetic breast surgery, and reconstructive surgery.
